

Plinths

HOME > KATEGORIE > EXTERNAL BUILDING SYSTEMS > PLINTHS

The base consists of four elements: corners, side covers and Z-sections fixing to the floor. Housing weight is transferred by corners. Easy to disassemble covers facilitate access to the space under the housing. Z-sections permanently fix the housing to the floor. It is possible to fix castors instead of floor z-sections. The bases are made in two heights: 100 mm and 200 mm. They are made of galvanized sheet of thickness: corners and z-sections 2 mm, 1.5 mm, after machining, they are painted to RAL9005_DS or of ground stainless steel of the same thickness.

OH - stainless steel 1.4301 (AISI 304)

KO - acid resistant steel 1.4404 (AISI 316L)
