

STES - Assembly rack for control cabinets

[HOME](#) > [KATEGORIE](#) > [ASSEMBLING FRAMES](#) > [STES - ASSEMBLY RACK FOR CONTROL CABINETS](#)

The assembly frame is a product made of the highest quality materials. It has two to four working pages - so up to four employees can work with it at the same time. This will certainly have a positive impact on work efficiency.

The electrical box rack can accommodate up to twelve boxes. All shelves are adjustable, so you can individually create the configuration that will be best for you. The advantage of this product is certainly the fact that it is ergonomic. The frame is completely mobile, so you can move it anywhere. All because it has wheels that are locked during operation.

The product can be ordered individually. The company will adapt the frame to the customer's needs. You can change not only the dimensions of the product, but also the number of shelves. The rack for electrical boxes is almost two meters high.

The frame is characterized primarily by high solidity of workmanship, thanks to which it can be used for up to several years. The product was created with the most demanding customers in mind. The structure is reinforced. The product will certainly also delight visually, because it was designed by a respected company specializing in industrial design. The product is ideal not only for the electrical industry, but also for many other industries. It is available at an attractive and competitive price.

The assembly table can be used to equip control cabinets from all manufacturers available on the market.
